Ref: Letter of recommendation and support for study program Management of Real Estate and Infrastructure (MA) and Law and Management of Real Estate and Infrastructure (BA) of College ESLG

With this letter of recommendation I hereby would like to express my support for the study program Management of Real Estate and Infrastructure (MA) and Law and Management of Real Estate and Infrastructure (BA). The study program is unique and of highest quality for the market of Kosovo and very much needed for filling the gap in the market of licensed real estate appraisers in Kosovo needed for the process of expropriation in infrastructure projects.

In the capacity of Chairman of Supervisory Board of Licensing of Real Estate Appraisers of Republic of Kosovo I have given recommendations for the development of program curriculum, learning outcomes, and the objectives of both programs have take into account the objectives of licensing program of real estate appraisers' state exam: 1) legal property education; 2) architecture and urban planning; 3) economics and valuation of real estate; 4) cadastral recording procedures;

As a consequence of such deep consultations with the Supervisory Board of Licensing of Real Estate Appraisers' of Republic of Kosovo graduates of College ESLG of Real Estate Management program of both levels bachelor and master have shown the best knowledge and learning competencies in the Real Estate Appraisal State Exam in terms of results, competencies gained, and ethics.

The implementation of both programs is of highest quality comparable to international universities, and my advice as a Chairman of Supervisory Board was duly taken into account always during both program development and program implementation.

Sincerely,

Shkëlzen Morina

Chairman of Supervisory Board for Licensing of Real Estate Appraiser
